Helios Technologies, Inc. Conflict Minerals Report For the year ended December 31, 2019

Introduction

This report for the period from January 1, 2019 throughDecember 31, 2019 (the "Reporting Period") is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934 ("the Rule"). The Rule was adopted by the United States Securities and Exchange Commission ("SEC") to implement reporting and disclosure requirements related to conflict minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ("Dodd-Frank Act"). The Rule imposes certain reporting obligations on SEC registrants whose products that are manufactured or contracted to be manufactured contain conflict minerals which are necessary to the functionality or production of their products. Conflict Minerals are defined as cassiterite, columbite-tantalite, gold, wolframite, and their derivatives, which are limited to tin, tantalum, tungsten, and gold ("3TG"). These requirements apply to registrants whatever the geographic origin of the conflict minerals and whether or not they fund armed conflict.

Company Overview

Helios Technologies, Inc. ("Helios", the "Company", "we", "our"), together with its wholly-owned subsidiaries, is an industrial technology leader that develops and manufactures solutions for both the hydraulics and electronics markets. Sun Hydraulics, LLC ("Sun Hydraulics" or "Sun"), Enovation Controls, LLC ("Enovation Controls"), Faster S.r.l. ("Faster") and Custom Fluidpower Pty Ltd ("Custom Fluidpower"), are the wholly-owned operating subsidiaries of Helios. The Company operates in two business segments: Hydraulics and Electronics.

There are three key technologies within the Hydraulics segment: cartridge valve technology ("CVT"), quick-release hydraulic coupling solutions ("QRC") and hydraulic system design ("Systems"). CVT products provide functions important to a hydraulic system: to control rates and direction of fluid flow and to regulate and control pressures. QRC products allow users to connect and disconnect quickly from any hydraulic circuit without leakage and ensure high-performance under high temperature and pressure using one or multiple couplers. Systems provide engineered solutions for machine users, manufacturers or designers to fulfill complete system design requirements including electrohydraulic, remote control, electronic control and programmable logic controller systems, as well as automation of existing equipment.

The Electronics segment provides complete, fully-tailored display and control solutions for engines, engine-driven equipment and specialty vehicles. This broad range of products is complemented by extensive application expertise and unparalleled depth of software, embedded programming, hardware and sustaining engineering teams. This technology is referred to as Electronic Controls ("EC").

Due to the timing of their acquisitions, Faster S.r.l. and Custom Fluidpower were integrated into our 3TG reporting for the first time this year.

Conflict Minerals Disclosure

We have prepared a Conflict Minerals Report to submit as an exhibit of our SEC filing and Disclosure; which is available at www.heliostechnologies.com under "Investors" in the "Governance" section.

Product Description

For the Reporting Period, Helios identified the following products manufactured or contracted to be manufactured by it as those containing 3TG:

Product Description	Used In	Finished Product
Solder	Circuit Boards and Cable	IR embedded amplifier
Pin	Circuit Boards	XMD Series
Connectors	Coils and Circuit Boards	Coils
Tantalum Capacitor	Circuit Boards	Displays
Integrated Circuit Boards	Circuit Boards	Panels
Circuit Board Assemblies	Circuit Boards	I/O modules
M7 Tool Steel	Form Tools and Taps	Hydraulics controls
Cable	Cable	Monitoring Instruments

Due Diligence

Environment

Helios has established a management system for compliance with conflict minerals regulations. The management system includes the development of a cross-functional team to implement the conflict minerals compliance strategy, consisting of members from supply chain, finance, legal, and operations, overseen by the Chief Financial Officer. Senior leadership is informed of the due diligence efforts on a regular basis. A supplier solicitation, documentation, and electronic record maintenance and retention program has been established.

B. Reasonable Country of Origin Inquiry ("RCOI")

Helios¹ has designed its due diligence framework for the Reporting Period to conform in material respects with The Organization for Economic Cooperation and Development ("OECD") Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (OECD Guidance) and the related Supplements for 3TG.

We assembled an internal team of representatives from supply chain, legal & compliance, engineering, and finance. We then analyzed the chemical composition of products, identifying those in which conflict minerals were known or thought to be used, and identified products or manufacturing materials which may contain conflict minerals along with their associated suppliers in scope.

We surveyed those suppliers via electronic solicitation regarding their conflict minerals programs, guided with products and materials data and with the aid of an independent research consultant using the template developed jointly by the companies of the Electronic Industry Citizenship Coalition® ("EICC®") and The Global e-Sustainability Initiative ("GeSI"), known as the Responsible Materials Initiative Reporting Template ("the Template").

Following the initial introductions to the program and information request, a reminder email and call were sent requesting survey completion to each non-responsive or unsatisfactory supplier. An escalation process was initiated for suppliers who continued to be non-responsive or non-conformant after the above contacts were made, explaining their suspected involvement with 3TG or 3TG sourcing activity and their obligation to supply data.

¹ Sun Hydraulics Corporation officially changed its name to Helios Technologies, Inc. on June 14, 2019.

C. Respondent analysis

Based on the results of the RCOI diligence process described above, we conducted a further analysis to determine the validity of the reported smelters/refiners and compiled our findings with respect to each of the following categories:

- whether the respondent has an established conflict minerals policy;
- · confirmation from suppliers reporting company-wide or product-specific results, where applicable;
- presence of materials suppliers on either the Responsible Mineral Initiative's Responsible Minerals Assurances Process "RMAP"-conformant list, active-smelter list, or subsequent "de-listing" from the 2019 RMI active smelter list;
- research on named company/organization websites and third-party review services for participation in smelting or refining activities; and
- review of publicly available corporate profile, non-government organization, and media websites.

The aggregate supplier response rate for 2019 was 80%.

Supplier Data Results

Based on the data obtained from our suppliers and otherwise obtained through the diligence process described above, we believe that the smelters and refiners identified in the RCOI diligence process described above are used to process certain of the necessary conflict minerals contained in products manufactured or contracted to be manufactured by us. While we cannot identify the origin of all of the 3TG in products we manufacture or contract to manufacture, we have reasonably determined that certain materials used in such production originate from two smelters in adjoining countries.

The following table depicts the status of our efforts to determine the smelters and refiners of 3TG in our supply chain for the Reporting Period:

*Note: 'Active Smelter' is defined as a 2019 RMI-listed smelter but is not known to be RMAP-conformant.

Risk Mitigation

We will continue to take the following steps to improve the due diligence conducted to further mitigate any risk that the necessary conflict minerals in our products could benefit armed groups in the DRC or adjoining countries:

a. include a conflict minerals cooperation clause in any new or renewed supplier agreements;

- b. engage with suppliers and direct them to training resources to encourage an increase in response rate and improve the content of the survey responses;
- c. engage and encourage any suppliers who are found to be supplying 3TG from sources known or suspected to support conflict in the DRC or any adjoining country, or whose practices may inadvertently allow for sources from the covered countries, to further understand their supply chain and establish an alternative source of 3TG that does not support such conflict;
- d. work with relevant trade associations to define and improve best practices and build leverage over the supply chain in accordance with the OECD Guidance; and
- e. further evaluation of future business with any supplier not taking beneficial action.

Note Regarding Statements of Future Activities

This Conflict Minerals Report contains forward-looking statements, including statements about future plans to improve due diligence regarding supplier responsiveness and to seek supplier commitments in this regard. Except as may be required by law, we undertake no obligation to update forward-looking statements to reflect future events or circumstances.

These forward-looking statements also involve known and unknown risks, uncertainties, and other factors that could cause actual events to differ materially from our expectations. These forward-looking statements are based on information available as of the date of this Conflict Mineral Report and are based on management's current views and assumptions.

Such risks and uncertainties include the veracity of information directly or indirectly provided to us by others and expectations regarding future smelter and refiner participation in conflict-free verification regimens.
